Information on our overseas business

In Japan, our company provides medical consulting services (support for opening hospitals and clinics, management support for hospitals and clinics), human resources services, and medical equipment/medical product sales services. We also conduct the following business overseas.

- Support for the establishment and management of medical institutions (hospitals and clinics) and care facilities overseas
- We not only handle all preparations for the opening of medical facilities (hospitals, clinics) and nursing care facilities, but also provide design and planning support.
- Overseas recruitment of Japanese hospitals and clinics: We engage in activities to recruit Japanese hospitals and clinics to overseas countries seeking to attract medical institutions.
- Medical equipment sales: We sell a variety of medical equipment and products overseas, including new and used large medical equipment such as CT scanners and MRI machines, medium-sized medical equipment such as dialysis machines, ultrasound diagnostic devices, and endoscopy devices, as well as medical vehicles such as mobile screening vehicles and ambulances.
- International procurement and sales: We procure and sell products from around the world.
- Overseas Medical System Support: We provide medical systems to promote medical efficiency and medical personnel efficiency. For example, we offer telemedicine services to medically underserved areas.
- Dispatch of Japanese Medical Personnel: We dispatch Japanese medical personnel, including doctors, nurses, midwives, radiological technologists, clinical engineers, and ultrasound technicians, to overseas countries.
- M&A of Overseas Medical Institutions
- Investment and Capital Contribution Consultations for Overseas Countries
